

AutoSpeedWatch report – April 2024

[AutoSpeedWatch at Bradford Road, Rode (B3109 northbound), **30mph limit**. Approaching (150 yards) mandatory 'Stop' crossroads at Rode Hill. Note that this is a dangerous junction. Two of the other approaches to the junction have illuminated flashing warning signs, recently installed by Somerset District Council. The ASW does not operate in times of darkness: naturally, available hours have been much longer in April than in March.]

In the period 01-04-24 to 30-04-24 (30 days approximately), in daylight hours only

The ASW has recorded, and we have verified, **3145** vehicles travelling at **40mph or over**.

There were **51** vehicles travelling at **50mph or over** (the highest at **63mph**).

There were **276** persistent (repeat) speeders in the active period, the most prolific showing **6** offences.

In the period 24-03-01 to 24-04-30 there were 444 persistent speeders, the most prolific showing **10** offences.

According to ANPR there were **103** un-taxed or expired-MoT vehicles in the active period. However, most of these are probably vehicles which were taxed late, early in the month following expiration.

ASW estimates that 38,578 vehicles passed through the location in the active period, with an estimated average speed of 33.8 mph, and an estimated 85th percentile speed of 46.5 mph (this is 'the speed that 85% of vehicles were travelling slower than').
