

# Rode Weather Report for October 2024

The following is a summary of the key readings on my Davis Vantage Vue weather station located in the middle of our back garden in Rode.

I have put the readings in a table and shown the equivalent readings since 2020 when I installed the system.

## October Readings

	2024
Average Maximum	16°C
Average Minimum	8°C
Max Temp/dates	19°C 17
Min Temp/dates	0°C 11
Total Rain	113.0mm
Max 24hr Rain	27.8mm 8-9
Days with Zero rain	7

Compared with the previous 4 years readings, this October appears to have been very average, certainly in terms of temperatures.

Rainfall at 113mm was lower than any of the previous 4 years but very similar to the average Frome Rainfall clocked by Michael Cooper in 2022 which was 110.97mm.

The end of the month saw the establishment of high pressure over the UK which is still with us bringing a southerly airflow with cloudy, damp but mild conditions throughout most of the country.
