

Rode Weather Report for November 2024

The following is a summary of the key readings on my Davis Vantage Vue weather station located in the middle of our back garden in Rode.

I have put the readings in a table and shown the equivalent readings since 2020 when I installed the system.

November Readings

	2020	2021	2022	2023

Max 24hr Rain	41.4mm 23-24
Days with Zero rain	7

In 2022 Michael Cooper reported that the average Frome November rainfall over the previous 22 years was 97mm, so my Rode reading of 99.0mm for this year is almost the same.

Michael recorded temperatures slightly differently, recording the 3pm temperature each day. For most days that would approximately correspond to the maximum for the day. He recorded this temperature for November for the years 2016-2022. His average daytime readings were:

November 2022 = 10.1°C November 2021 = 9.3°C November 2020 = 10.4°C
 November 2019 = 8.6°C November 2018 = 9.5°C November 2017 = 8.5°C
 November 2016 = 8.2°C

In comparison my readings for 2023 and 2024 of 11°C were slightly higher.
